

Rasheed Bustamam

Senior/Lead Full-Stack Engineer

Address: United States

LinkedIn: <https://www.linkedin.com/in/abustamam/>

Full-stack engineer with 8+ years of experience building scalable and user-centric applications, leading teams, and collaborating cross-functionally to deliver impactful solutions. Adept at driving the entire engineering process from ideation to deployment while fostering a culture of inclusivity and growth. Proficient in modern web technologies such as React, TypeScript, Remix, Ruby on Rails, and AWS.

EXPERIENCE

Embedded Insurance, Inc.

Aug 2023 - Present

Senior Software Engineer

- Built and documented a custom React component library integrated with Retool for dynamic agent dashboards, reducing onboarding friction and improving user workflows.
- Collaborated with cross-functional teams and internal users to enhance processes, using Twilio and SendGrid integrations to streamline communication pipelines.
- Implemented data enrichment workflows using Playwright and LLM-powered automation, improving lead quality and agent productivity.

Edvo

Aug 2020 - Jul 2024

Founding Engineer

- Architected and documented a graph-based data model backed by Firestore, enabling seamless real-time collaboration for users across web, browser extensions, and Electron apps.
- Implemented an in-app test suite using Playwright, driving robust test coverage and reducing production issues.
- Played a key role in fostering team culture, providing regular mentorship to junior developers, and driving cross-team collaboration to align on architectural decisions.

CDK Global/Salty

Sep 2021 - Jul 2023

Senior Software Engineer

- Developed and maintained a PCI-compliant insurance quoting platform using Puppeteer and Stripe for secure form automation and payment processing.
- Provided mentorship and guidance to engineering peers, facilitating learning sessions on best practices in automated web scraping and secure payment handling.
- Partnered with product support and technical program managers to

SKILLS

Frontend Development

- React, Remix, React Native, Vue.js, Chakra-UI, GSAP, Leaflet, Web3
- Responsive Design, Dynamic Forms, Custom Component Libraries

Backend Development

- Node.js, Express, Ruby on Rails, Prisma, Temporal Workflows
- API Design (REST/GraphQL), AWS Lambda, Serverless Architecture

Blockchain & Web3

- Solidity, NFT Mechanics, Smart Contracts, Wallet Integration

Testing & Automation

- Playwright, Puppeteer, End-to-End Testing, CI/CD Pipelines

Databases

- Firestore, AWS RDS, DynamoDB, Contentful

Cloud & DevOps

- AWS (S3, Lambda, RDS, DynamoDB), Docker, Serverless Framework
- Infrastructure-as-Code, Cloud Automation, Deployment Pipelines

Integration Tools

- Stripe (Frontend/Backend), Twilio, SendGrid, Retool

Project Management

- Agile Methodologies, Jira, Team Leadership, Cross-functional Collaboration
- Mentoring Junior Developers, Stakeholder Management

Programming Languages

- JavaScript (ES6+), TypeScript, Solidity, Ruby

UI/UX Design

- Interactive Dashboards, Animation with GSAP, Data Visualization

design features that reduced friction in user-facing processes and enhanced internal team workflows.

FullStack Labs

Jun 2019 - Aug 2020

Senior Software Engineer / Project Lead

- Led a team of six engineers across six client projects, including a Shopify-integrated platform for Cytex Biosciences and a Rails content management app for SunDoc Filings.
- Documented and communicated architectural designs for client projects, enabling smooth handoffs and scalable implementations.
- Demonstrated leadership by breaking down high-level client goals into actionable tasks and timelines without extensive product and design input.

XY | The Findables Company

Jul 2018 - May 2019

Senior Front-End Blockchain Engineer

- Developed a location-based NFT game showcased at a 1,000+ attendee conference, using Leaflet, Web3, and Solidity for blockchain integration.
- Collaborated with internal teams to plan, build, and iterate on front-end features that enhanced user engagement through gamification.

CoNarrative

Dec 2015 - Jul 2018

Junior Front-end Engineer

- Built interactive dashboards for Panzura using React, Leaflet, and GSAP, improving data visualization and user experience.
- Created documentation and contributed to shared front-end patterns to promote code reuse and consistent development practices.

- Scalable Design Systems, Accessibility Best Practices

Other Skills

- LLM Integration (Generative AI), PCI Compliance, Data Scraping & Enrichment
- Hybrid App Development (Electron), Browser Extensions
